Background

Summary

Since graduating from University of Windsor in 1977 with a Bachelor of Social Science in Communications I have accomplished many exciting goals and hope to continue my sojourn in career expansion and personal growth to achieve satisfaction. Business can be a personal developed sense of self which I feel after over 30 years of being out there with people, writing about them, talking to them, selling things and ideas to clients, networking with various personal contacts and self marketing have allowed me to achieve a certain status while earning a living. I am the primary candidate to achievement in the beginning as a free lance novice in human interest, a salesperson and model of designer clothing. It has been a unique personal climb to a unique ongoing future. I would not recommend what I have done to everyone if you prefer the security of a everyday job, but it definitely has had its own rewards and the people I have met along the way have made it that much enjoyable. I hope to continue in my learning capacities and ongoing meetings of new ideas, ventures and interactions in a creative interactive marketplace. .

Specialties: The best is product knowledge of what I am selling in high end retail fashion, or writing an article on what is new in fashion, music, or a human interest story. Selling ability combined with writing skills has enabled a two fold career(s) which is ever changing, fast paced and never boring.
